The Book That Made Your World: How The Bible Created The Soul Of Western Civilization

Synopsis

Understand where we came from. Whether you're an avid student of the Bible or a skeptic of its relevance, *The Book That Made Your World* will transform your perception of its influence on virtually every facet of Western civilization. Indian philosopher Vishal Mangalwadi reveals the personal motivation that fueled his own study of the Bible and systematically illustrates how its precepts became the framework for societal structure throughout the last millennium. • From politics and science, to academia and technology, the Bible's sacred copy became the key that unlocked the Western mind. Through Mangalwadi's wide-ranging and fascinating investigation, you'll discover: What triggered the West's passion for scientific, medical, and technological advancement How the biblical notion of human dignity informs the West's social structure and how it intersects with other worldviews How the Bible created a fertile ground for women to find social and economic empowerment How the Bible has uniquely equipped the West to cultivate compassion, human rights, prosperity, and strong families The role of the Bible in the transformation of education How the modern literary notion of a hero has been shaped by the Bible's archetypal protagonist Journey with Mangalwadi as he examines the origins of a civilization's greatness and the misguided beliefs that threaten to unravel its progress. • Learn how the Bible transformed the social, political, and religious institutions that have sustained Western culture for the past millennium, and discover how secular corruption endangers the stability and longevity of Western civilization. •

Endorsements: • "This is an extremely significant piece of work with huge global implications. Vishal brings a timely message." • (Ravi Zacharias, author, *Walking from East to West and Beyond Opinion*) • "In polite society, the mere mention of the Bible often introduces a certain measure of anxiety. A serious discussion on the Bible can bring outright contempt. Therefore, it is most refreshing to encounter this engaging and informed assessment of the Bible's profound impact on the modern world. Where Bloom laments the closing of the American mind, Mangalwadi brings a refreshing optimism." • (Stanley Mattson, founder and president, C. S. Lewis Foundation) • "Vishal Mangalwadi recounts history in very broad strokes, always using his cross-cultural perspectives for highlighting the many benefits of biblical principles in shaping civilization." • (George Marsden, professor, University of Notre Dame; author, *Fundamentalism and American Culture*) •

The broad-brush thesis of this book is this: without the Judeo-Christian worldview, there would be no Western civilisation as we know it. The Hebrew Old Testament and Greek New Testament have contributed more to the development of the West than any other single factor. In over 400 information-rich pages the Indian-born scholar documents how the Bible directly and profoundly contributed to the rise of the West. And not only has the West benefited immeasurably - so too has the rest of the world. Indeed, he argues that the "Bible was the force that created modern India" as well. Of course this thesis is not new. One thinks of the recent works by Rodney Stark, Jonathan Hill, or Alvin Schmidt. Also recall the two volumes by D. James Kennedy: *What if Jesus Had Never Been Born?* (1994) and *What if the Bible Had Never Been Written?* (1998). But here we have a masterful presentation of the data in a finely written and cogently argued volume. As Mangalwadi reminds us, the Bible first of all transforms individual human beings, who in turn transform entire nations. In every area of life we see this remarkable record of personal and social transformation. In whatever area we examine, we see the hand of Scripture all over it. Be it science, or health care, or literature, or learning, or liberty, the biblical worldview touched and transformed entire societies. Mangalwadi very capably discusses the big picture as well as the many individual cases. Consider the area of technology for example. A quote from Marburg historian Ernst Benz sets the stage: "Christian beliefs provided the rationale, and faith the motive energy for western technology." Says Mangalwadi, "Benz had studied and experienced Buddhism in Japan."

THE BOOK THAT MADE YOUR WORLD is an intellectual Tour De Force arguing and illustrating the influence of the Bible on Western Civilization and its positive role in creating much of the good that many in the west take for granted, from the freedoms of women to simple respect for life. He takes an interesting path to his thesis; starting with Kurt Cobain vs Bach and going on from there.

His individual chapters take specific aspects of Western Culture from Humanity, Heroism, Science, Morality, Self and Technology and reflect how the biblical view not only shaped these and other aspects in a positive direction in the western world, but how the lack of the Bible and the biblical worldview caused other cultures to fall behind both in terms of technology and in what the west would consider respect for basic humanity. Those who read the volume will be surprised at how little the Bible itself is quoted, instead it tells of cultures, nations and individuals driven by its message and how that makes all the difference. Some of his arguments are stronger to advance, the points concerning corruption in office, the university system and technology are pretty easy gimmes. Most interesting is the semi random inclusion of individual stories from his own life and observations from India, including the violence he and his families and friends suffered due to his faith and actions. He is unwilling to sugar coat the difference between the liberal laws of India on the books, a gift provided and influenced by British Common Law shaped by the Bible vs the practice (or rather non-practice) of those same laws by those officials of different cultural background non longer overseen by a colonial power. Yet he managed to convey this while condemning colonialism as an evil.

I have questions about the thesis of Vishal Mangalwadi's *The Book That Made Your World*, but this book prompts me to first ask a few questions of myself. Am I able to approach this book without bias? As a Christian, it is of course very pleasing to hear positive statements about the influence of the Bible. I would expect God's holy word to have a great and lasting influence on individuals, as well as on communities and cultures. I believe, after all, that the God of the Bible is the creator of the universe. His word is true. However, I found within myself an oddly opposing bias, as well. As a westerner, I am regularly exposed to multi-culturalism, anti-western thought, and outright Christianity-bashing. The mere suggestion (among even Christians sometimes) that Christianity might be superior to other religions or philosophies is met with accusations of ignorance and ethnocentrism, along with accusations that I must think "America equals Christianity". I actually hadn't realized how much this exposure had affected my worldview until I was reading Mangalwadi's book. While my faith was making me hopeful, the influence of my unbelieving culture was making me very skeptical. As I read, I found my biases tugging against one another, leaving me unable to either accept or reject the thesis of the book. Am I learned enough to make a fair judgment? Some of the book's critics do claim to have some expertise in Buddhism, Hinduism, or Eastern culture. But I have to wonder if those same people are as well versed in what the Bible says. To do a little American-bashing myself, I find that many well-educated Americans are abysmally ignorant of the

teachings of Judaism and Christianity. I am often left wondering if these people have actually ever read the Bible.
